ANNUAL REPORT OF THE

POLICE DEPARTMENT

CITY OF NEW YORK

OFFICE OF THE COMMISSIONER

AUGUST 1, 1917.

HON. JOHN PURROY MITCHEL,  
Mayor, City of New York,  
City Hall, New York, N. Y.

SIR :

I have the honor to transnit the report of the Police Department for the year 1916, the statistics for which were forwarded to you at the beginning of the present year.

WORK OF THE NEUTRALITY SQUAD

Since the outbreak of the European war, for a year and a half now, the police of the city have been confronted with an enormous increase of work and a variety of new cases to handle. This is so because the Port of New York, through which representatives of the countries entangled in the war have been constantly traveling, and from which large quantities of supplies and munitions are being shipped abroad, at once became the centre of all kinds of secret alien activities.

The first manifestation of force appeared shortly after the war began in the form of fires in steamships and on piers of those companies engaged in carrying goods to the Allied governments.

In co-operation with Federal authorities, members of the Neutrality Squad were immediately assigned to the work of discovering the perpetrators of these crimes and to secure evidence for the prosecution of such cases in the courts of this country. The first arrests were made in October, 1915, when six men were charged with conspiring to destroy ships in New York Harbor. The men were taken before the crimes were consummated, the explosives and bombs which they intended to use, seized, and by the testimony of experts given in the trial, the fact established beyond question that this quick police action had prevented great loss at sea of human life as well as much property.

Following these initial exposes and the bringing of the culprits to justice, several more arrests were made in the months immediately following, notably

## POLICE DEPARTMENT

---

one in December, 1915, of a German agent who conspired in New York to blow up factories turning out ammunitions for the Allied governments; those in December, 1915, and January, 1916, in which six German agents were seized charged with conspiring in New York to blow up the Welland Canal, Canada, and two with stealing cablegrams and telegrams from a New York bank containing records of money and contracts relating to the munition details of the Allied governments—where these supplies were being manufactured in this country, together with the dates of shipments, etc., etc. Three more arrests were made in March, 1916, of German agents charged with conspiracy to seize ships after they had left New York Harbor and destroy them at sea, one of these prisoners being sentenced to serve life imprisonment. Another arrest in April, 1916, rounded up eight other German agents charged with the destruction of cargoes and steamships between the Port of New York and various harbors of England, France, and Russia, the evidence in this case showing that German agents were being supplied with money and that bombs were being manufactured on German steamships lying in the Port of New York. In December, 1916, ten other German agents were seized charged with the larceny of a shipment of several hundred binoculars valued at several thousands of dollars enroute to the Russian Government, the binoculars being recovered and returned to the representatives of Russia.

Late in 1916, three German agents, two of whom were Hindoos, and the third a German, were arrested by the members of the Neutrality Squad charged with shipping arms and ammunition out of this country to India to start a revolution there. These prisoners admitted that they were financed to the amount of several hundred thousand dollars by the German government. Their cases went over to 1917 for trial.

In addition to the foregoing, thousands of persons suspected as German agents, and violating the neutrality laws of this country were investigated by members of this squad. The Detective Bureau was literally almost swamped with reports and communications from all angles. In many cases, the investigations proved the allegations to be without foundation, and those suspected to be law-abiding citizens. Other alleged suspicious persons while they had violated no laws, were found to be indiscreet in their actions and expressions and were carefully instructed as to the law of the land. Various groups who, from time to time, had attempted to create industrial disturbances, and who were suspected of being financed by German agents, have been kept under surveillance by members of this Squad.

The activities of the members of this Squad since the outbreak of the European war have made such an impression upon the remaining German agents under cover in this land, that most of them apparently have discontinued their criminal conspiracies and fled, some of them returning in roundabout ways to Germany and others going to Mexico, South, and Central America. While

## ANNUAL REPORT OF THE

---

these classes of crime were entirely new to the Detective Bureau, and the systematic and vigorous work of the officers and men in charge of the cases has had a salutary effect, it is impossible to state what may happen in the future, but up to this writing no crimes of violence have been committed since the declaration of war against Germany by the United States on April 6, 1917.

In addition to the above, other important arrests were made by members of the Neutrality Squad in connection with crimes of violence by bombs and explosives during 1916, notably the detection and arrest of two Italian anarchists charged with having a bomb in their possession while in front of the Municipal Building in January, 1916, both being later sentenced to seven years each in State's Prison; the arrest and conviction of an Italian bomb thrower in Brooklyn who was later sentenced to 15 years in prison; and the well-worked out solution of the conspiracy to damage the Subway station at 110th Street and Lenox Avenue in October, 1916, with bombs, the perpetrators of which were run down and arrested in two weeks' time, the whole plot laid bare, four of the six up to this time tried and convicted, and the other two awaiting trial.

### HOMICIDES.

There were 265 homicide cases in the Greater City in 1913 exclusive of infanticides, abortions, accidental homicides and justifiable homicides by officers in the discharge of their duties. In 1914 the number was reduced to 244; in 1915 to 222, and in 1916 the number dropped to 186. This constant reduction can be traced to three distinct efforts on the part of the police:

First: Rigid and sustained enforcement of the law against carrying concealed weapons.

Second: Constant attention to places where gangsters are likely to congregate. Many of these gangsters do not carry concealed weapons, but have a way of getting weapons on short notice and using them for the purpose of murder. As a result of the Department's efforts, many of them have been driven from the city, and others, encouraged by policemen, have abandoned their old associations and for the time being, at least, have got self-supporting jobs.

Third: The arrest and subsequent conviction of a number of murderers several months, and in one or two cases, more than a year after the commission of the crime. When the criminal class is persuaded that the police will continue their efforts in detecting crime for a long period after the commission of the crime, the moral effect can hardly be exaggerated. The police worked steadily for more than a year on the Baff murder case before the chain of evidence was completed, and when the arrests were made, and the collection of evidence for the trial begun, the enormous amount of detective work that had been done, hour by hour, day by day, was revealed. Such persevering work on the part of the police force cannot fail to make an impression on the criminal classes.

### STREET CAR STRIKES.

Beginning late in July, differences of opinion between the Traction Companies and their employees resulted in a series of strikes, which lasted until late in the fall.

These strikes, on account of the number of people engaged and the area of the city covered, imposed upon the Police Department an emergency duty, requiring the best thought and energy of the entire Department.

The results were gratifying. No lives were lost, no shots were fired, and in comparatively few instances was there necessity for dispersing a crowd or making arrests. Except for an explosion in a subway station, the perpetrators of which have been arrested, the strikes can fairly be said to have run their course without violence.

Members of the Force were particularly and frequently instructed as to the legal rights of both employer and employee, and were ordered to preserve absolute neutrality between the several parties. Legal picketing was allowed, and, generally speaking, illegal picketing was prevented.

Most of the cars that were operated were operated safely, and in almost all instances the passengers thereon were given full protection.

The strike drew heavily upon the reserve force of the Department, necessitating extra hours of service and much physical inconvenience, not to say privation. Nevertheless, the work was done with the best of spirit and loyalty by the men. The Commanding Officers showed increasing skill in making dispositions of their commands, and commendable forethought and energy in caring for the health and comfort of their men.

### MERIT SYSTEM.

For a long time we have been keenly alive to the fact that one of the greatest drawbacks to good police work is the fact that a member of the Force has no better chance of promotion if he does conscientious, active, alert, painstaking work, than he has if he only works just hard enough to get along without running into trouble. The Civil Service system of promotion encourages mediocrity of effort.

We have been trying to see if this could be overcome to some extent by establishing a system of records which should show the day-by-day, good or bad work of members of the Force. If this can be accomplished, the work that men do would count for promotion; this cannot fail to improve the quality of police work.

On the first of March a provisional system was put into effect as an experiment, and the results seemed promising enough to make us adopt it regularly. If it is successful in fairly recording the work of patrolmen so that one can be compared against another, I feel that a real step forward will have been made, not only toward a more effective policing of the city, but toward fairer treatment of the men.

## ANNUAL REPORT OF THE

---

### THE HOME DEFENSE LEAGUE.

The past year has seen the Home Defense League, which was established in 1915, welded into a permanent organization with a membership close to 22,000, drilled by police and army officers, and firmly established as a strong auxiliary to the Force. This League, as founded, is a body of citizens public-spirited enough to manifest actively a real interest in the Police Force of the city; who have a healthy desire to know more about the work of the men who patrol the city night and day; who wish to receive some of the same training that makes these blue-coated guardians such fine physical specimens; who wish to show through such an organization that citizens can help policemen in a practical manner; who wish to share responsibilities in an emergency, and at all times be a big moral force behind the police and a connecting link between the police and the great mass of citizens.

The Home Defense League is not a military body; it has no connection with the Plattsburg Training Camp or the regular army. Its members are armed with nightsticks and police whistles, wear a distinct "League" uniform, forestry green in color, bronze police buttons, canvas leggings and black shoes, and campaign hat with green and white cord. The precinct number is worn as a collar decoration to distinguish members of the Home Defense League from the National soldiers.

The first Home Defense League company was raised in the Brownsville district, Brooklyn. In rapid succession other companies were organized throughout the ninety-odd precincts, and 5,000 were enrolled in a very short time. Most of this work was done at the suggestion of commanding officers of precincts, but with the membership at 5,000, members of the League took recruiting into their own hands, and inside six months had jumped the strength of the League from 5,000 to 22,000.

In the early part of the summer of 1916 the membership of the League dropped to a low figure, but at the end of 1916, facing the year 1917 and the international crisis, its membership rapidly increased. Nearly every precinct in the city had at least one company, each officered by a Captain, two Lieutenants, and Sergeants and Corporals in proportion to the number of men, the members representing about every class in the community, including day laborers, business and professional men, actors and writers. Funds for equipment have been raised, in most cases, by entertainments given by citizens of the precincts. Schoolhouses, armories, streets, parks, plazas and the roofs of the larger office buildings have been used for drill purposes.

Companies of the League have several times been called upon for duty. They have helped in trying to reduce the number of street accidents. They were used during the epidemic of poliomyelitis during the summer of 1916, when the Police Commissioner called for assistance in a sanitary patrol of the city, by blocks. The Leaguers have responded in force and rendered valuable assistance

POLICE TRAINING CAMP AT FORT WADSWORTH

## POLICE DEPARTMENT

---

to the police in holding the firelines, and have been of material service in rendering voluntary aid in several lines of police activities where their particular experience and training has been a great asset.

### THE FORT WADSWORTH CAMP.

Early in the spring, it was decided to hold a camp during the summer for members of the Force, where policemen could be trained in quartermaster and supply work, camp sanitation and transportation, together with such parts of the school of the soldier, manual of arms, close and extended order drills as might help to make them better policemen. A call was sent out for volunteers. Over 3,500 policemen, including all ranks, responded, signifying their desire to attend and to pay the necessary expenses. These expenses were figured to be \$6 for uniform and \$6 for mess, and it may be said here that the purchase, cooking and serving of food was so well handled that each camp not only lived exceedingly well out of this assessment, but saved money.

Through the cordial co-operation of Major-General Leonard Wood, the camp was located within the Fort Wadsworth military reservation at the Narrows, on Staten Island. The regular army furnished tents, cots, mess kits, cooking utensils, bedding, rifles, bayonets, ammunition belts, and regular army officers were assigned to the camp as instructors.

Forty cents a day a man was allowed for mess purposes, supplies being purchased in the open market. The quartermaster, lieutenants and sergeants were selected from among those members of the Force who had had previous instruction in this work, and cooks were chosen from among members of the Force who had been employed as cooks previous to joining the Force.

On account of the limited size of the camp site the strength of each encampment was limited to a battalion, or three companies of about 340 men. Later, as the machinery of the camp improved, this number was increased by 50. Each camp was in charge of an Inspector with a staff of a lieutenant acting as district quartermaster, a sergeant, and a patrolman as clerk. Each company was in command of a captain assisted by a commissary lieutenant, a first and a second lieutenant of the line, and six sergeants. Patrolmen were appointed corporals, those being selected who had had previous military training.

The first camp left Pier A, N. R., at 7 A. M., on March 28, and was transported to the Government reservation on the police steamer "Patrol." The men wore police uniforms until their arrival in camp, where they changed into the training camp uniform. This equipment was packed in suit cases properly tagged, and delivered in camp twenty-four hours before their arrival, by the quartermaster. After this issue, policemen's uniforms were worn only when a man had to leave camp on police business.

While in camp the men were subject to the same discipline as is provided by the rules and regulations of the Police Department. They were also ex-

## ANNUAL REPORT OF THE

---

pected to abide by the rules of the regular Army. The men were not allowed to leave camp except on police business or when excused by the Police Inspector for personal reasons.

Under the supervision of Captain, now Major Martindale, Coast Artillery, and a staff of Army officer assistants, each camp was instructed for a period of two weeks in the following elements of drill:

1. Orders, commands and signals.
2. School of the Soldier.
3. School of the Squad.
4. School of the Company.
  - (a) Close order.
  - (b) Extended order.
  - (c) Fire.
  - (d) To be elected.

Elective courses were offered in camp sanitation, hygiene training and discipline, courtesies, patrol, wounds and how to dress them, and riots. These courses were given by regular Army and police officers and police surgeons. In the evening and in leisure time off duty the men were entertained by moving pictures, music, and by lectures.

Following is a schedule showing the dates of the different camps, and the number of men attending:

1st camp May 27 to June 12.....	342 men
2d camp June 12 to June 26.....	331 men
3d camp June 26 to July 10.....	338 men
4th camp July 10 to July 24.....	383 men
*5th camp July 24 to Aug. 5.....	387 men
6th camp August 14 to August 28.....	351 men
*7th camp August 28 to September 7.....	377 men

---

2,509 men

\*Members of the fifth and seventh camps were ordered back for strike duty before the termination of their camps.

It is difficult to over-estimate the practical value of this camp to the Force. It was, probably, the first one of its kind ever held in this country, or any other, and its results will be secured and increased in value if it is possible to establish another camp before last summer's instruction is forgotten.

### REVOLVER AND RIFLE CLUB

Last November members of the club which was organized in October, 1915, had rifle practice on the Fort Wadsworth range. Ninety-five men in the first string, in charge of a captain, spent two successful days on the range, and in addition to shooting, were instructed in the care of the rifle, holding, sighting and trigger squeeze, by Lieutenant Williams of the Coast Artillery Corps, Lieutenant Olaf Simonstadt, of the Force, and ten patrolmen assistants, all of whom had seen service in the regular army. Shooting on the range continued at odd

ONE OF THE POLICE BATTALIONS AT THE TRAINING CAMP

## POLICE DEPARTMENT

---

days until December 14, and in this time ten companies, consisting of a total of 951 members, attended practice, 243 of them qualifying as marksmen.

The use of this range, and the army instruction, was obtained through consent of the Department of the East. The course of practice was selected from the list prescribed by the National Rifle Association, of which the New York Police Department Revolver and Rifle Club is a member. This practice consists of shooting at 200 yards, 20 shots slow-fire, and 20 shots magazine fire, 5 shots each crome, squatting, kneeling and standing; an aggregate score of 150, or a total score in magazine fire of 75 being necessary to qualify.

The rifles used by the club have been acquired through the National Rifle Association, a bond having been given by the club as surety for their safe keeping. These rifles, 478 in number, were received on May 23, 1916, from the Ordnance Office at Governors Island, and were stored at Headquarters and in armories in various parts of the city, where they have been used through the co-operation of those armories by policemen at rifle practice.

### METHODS OF PATROL.

Following the policy adopted at the beginning of the administration, changes have been made from time to time in the patrol work to adapt it to the needs of the particular districts covered.

Many theories have been advanced as to how a big city should be policed, and many systems have been tried in New York. Systems that look good in theory have not worked out well in practice. The length of posts, for one thing, has to depend on the number of men available and the work to be done. Crimes, complaints of crimes, fire and fire hazards, character and density of populations, pedestrians and vehicular traffic, accident hazards, character of property to be protected, the burglary hazard, all have to be given weight in determining the length of a post.

Experience has taught that the best results are secured by having the backbone or center line of a post straight or as nearly so as conditions permit, the additional territory required to make up the post to be half or whole blocks on the crossing street. This permits of the ready discovery of fires at night while people are asleep, and if a patrolman wishes to make a quick inspection of his post he can give a glance down each cross street as he passes it.

Where traffic is heavy and congested posts must be comparatively short, and on some of the main arteries of traffic mounted men are necessary to keep this traffic moving and orderly. In sections where push-cart peddlers are numerous, in tenement districts where great numbers of children occupy the streets, in locations where troublesome, disorderly and unlawful elements resort or reside, posts have to be shortened. In suburbs and sparsely settled districts they may be lengthened and covered by mounted men, bicycle men, or telephone booths, according to the character of these districts and the condition of the roads. In some such dis-

## ANNUAL REPORT OF THE

---

tricts the bicycle has been found far superior to the horse, but where the roads are rough mounted patrolmen may be necessary.

Telephone booths as described in the report for 1915 have been of particularly good service, especially in residential districts, detached dwellings and park areas. The booth offers practically the same facilities as a sub-precinct, in that it is connected with police and public telephone systems, so that a policeman may be called quickly. Such calls have been made and a motorcycle policeman has reported at the remotest point of the precinct within a period of six minutes, whereas prior to the installation of the telephone booth, it would have taken forty-five minutes to one hour before a patrolman could have been landed on the spot where he was wanted. Formerly one of the most frequent causes of complaint in these districts was that a citizen could not find a policeman when wanted. This has been greatly remedied by the booth system, because most citizens have telephones within easy access, either in their house or the house of a neighbor, and they can call a policeman practically without leaving their premises.

### MOUNTED POLICE RIDE THREE HUNDRED MILES.

As a part of the police preparedness work, a troop of forty-five mounted men, which was to give an exhibition at the Annual State Fair, was ordered last autumn to ride the three hundred miles to Syracuse, camping each night along the way, instead of going by train, as in previous years. This was done to accustom the men to life in the open, and to teach them how to care for themselves and their mounts while removed from permanent quarters.

The troop left the Sheepfold in Central Park early one Sunday morning in late August, and reached the State Fair Grounds in about twelve days. Neither horses nor men had any training for this march, but were taken, as they were, off post, and sent away on less than twenty-four hours' notice. Animals and men stood the trip remarkably well. Neither the surgeon who accompanied the troop, nor the police lieutenant acting as veterinary, had any serious cases to require their professional services. That there was an absence of both casualties and illness speaks highly for the officers and their attention to their work.

The trip back to the city was made by train, under emergency call on account of the traction strike. Horse cars not being available, ordinary freight cars were taken, fitted up with stalls and bunks by members of the troop from scrap lumber picked up on the Fair Ground, and the troop landed at 42d Street, Manhattan, ready for duty twelve hours after receiving its orders to return.

### TRAINING SCHOOL.

Police work throughout the city is kept to its present standard largely through the work of the Training School instruction at Headquarters, for the scope of the work goes far beyond training recruits, and includes lecture courses for Inspectors and Captains, classes for Lieutenants, Sergeants, and Patrolmen; classes for Traffic Duty, Mounted Duty, Motorcycle Duty, Etc. The usual course for recruits consumes twelve weeks, and their instruction covers the following

· MOUNTED POLICE IN CAMP FOR THE NIGHT ON THEIR 300 MILE RIDE TO THE STATE FAIR

## POLICE DEPARTMENT

---

subjects: Department, patrol, observation, crime classification, arrests, traffic, automobile identification, animals, fires, accidents, first aid, sanitary code, public nuisance, co-operation with other departments, general ordinances, disorderly conduct, felonies, misdemeanors, assaults and weapons, homicide, robbery and larceny, burglary, children, court procedure, public morals, report making, election law, malicious mischief, Sabbath law, rules and regulations, laws and ordinances, and usages and customs of the Department.

When the subject of court procedure is reached there are moot courts, and the recruits are taken to the various courts to observe the manner in which cases are handled and evidence is presented. Lectures are given by police authorities on special subjects, such as parades, street gatherings, signal boxes, co-operation with the Detective Bureau, sanitary conditions, accidents, etc.

Physical training is one of the most important parts of the curriculum. An hour in the morning is devoted to setting-up exercises, and drills, and an hour in the afternoon to an improved form of jiu jitsu and self-defense. In addition recruits are taught how to swim, how to resuscitate persons taken from the water, how to reach and scale fire-escape ladders, how to walk properly to avoid trouble from falling arches. The drill forms an important part in the training, because a body of men, unless well drilled, cannot be moved quickly and smoothly from point to point. As walking is such a prominent part in the policeman's life, recruits are periodically taken into the suburbs for walks of fifteen miles and more, over country roads, to prepare them for patrolling on eight-hour tours. On these hikes they receive drill instruction in practical formations which cannot very well be executed in-doors, owing to the limited space. The class rooms where officers and men study for promotion have had a steady increase in attendance, 200 attending regularly on their own time during 1915.

All applicants for traffic duty by members of the Force are given 15 days' instruction on traffic by the school, which instruction covers not only the rules of the road and laws relating to traffic, but practical lectures on the handling of accidents, the relieving of congestion of traffic during fires and parades. The men are also drilled in the standard signals. At the end of the course an examination is held. Only those men who pass are assigned to the Traffic Division.

During 1916 the Training School at Headquarters has been visited by representatives from Police Departments in a number of the larger cities of the United States, as well as cities from the Latin-American Republics in Central and South America, to study our methods of police training with a view to starting similar schools of their own.

### HARBOR B'S FLOATING STATION.

Marine Division "B," known to the police as "Harbor B," whose station-house for years has been an old Manhattan mansion at the foot of East 120th Street, late in the autumn moved into new quarters on Randall's Island, oppo-

## ANNUAL REPORT OF THE

---

site East 125th Street. The new station-house, a departure from the usual type of these buildings, was built on a 40 by 70-foot barge, obtained from the Department of Docks and Ferries. The house, a two-story structure, has been equipped with a regular police desk, telephone connection, dormitory, sitting room, lockers, etc., and when not otherwise required, is moored at a dock adjoining a plot 300 by 300 feet, obtained from the Department of Charities, on the northwest end of the Island. Close at hand on this plot are also located the repair plant and the marine railway of the Harbor Police. Part of the house, the repair plant, marine railway and the dock entire were built by the policemen themselves.

If at any time an emergency should require the establishment of a temporary precinct, no matter where, in the waterways around New York City, this station-house can be towed by the police boat "Patrol," and moored wherever needed, providing a headquarters for the patrol launches and for the direction of all police work in that vicinity.

The new station was officially opened October 25, 1916, the Police Department on that day turning back to the city water front property valued at \$300,000. The members of Harbor "B" now have better quarters than heretofore, better facilities for hauling out and repairing of boats, more ground for the storage of boats, and a plant worth at least \$75,000, all at a total cost of about \$4,000, \$10,000 alone being saved by police members of the precinct doing work on the plant and structure during their tours of reserve duty.

### WORK OF THE TRAFFIC DIVISION

The Traffic Division of the Police Department has two distinct, although closely related, jobs. Its first, and most important task, is to prevent accidents to pedestrians. Its second task is to facilitate vehicular traffic and to allow such traffic to move with as much rapidity as is consistent with safety to the pedestrian. In the past year 18,336 drivers of vehicles were arrested or served with summonses, and of this number 17,963 were convicted. Fines amounting to \$258,897.00 were imposed and 204 prison sentences were imposed.

Under the direction of the Traffic Division car-stop safety zones in the public streets were greatly increased in number for the purpose of protecting passengers while boarding or alighting from street cars. The number of safety isles in congested traffic centers was increased to make safer the passage of pedestrians. And the number of one-way streets was enlarged to permit facility of vehicular traffic in congested places.

It is a regrettable fact that street accidents do increase, and this matter is one of the most serious problems that confronts the Police. Should a law be passed, giving the Police some control of the movements of pedestrians, and should the enforcement of this law be supported by a proper public sentiment, it is quite likely that not only will the increase in street accidents be checked, but that a decrease in the present number may be accomplished.

FLOATING PRECINCT STATION HOUSE BEING TOWED TO A TEMPORARY EMERGENCY STATION

## POLICE DEPARTMENT

Police regulation at the intersections of crowded streets can secure to the pedestrian a reasonable degree of safety, but when the pedestrian is permitted to cross a crowded thoroughfare in the middle of the block the Police can do nothing to secure his safety except by a reasonable regulation of the speed of vehicles.

### STREET ACCIDENTS.

The second year of systematic collection of street accident statistics was marked by an improvement in accident conditions in general down to the beginning of the street railway strike in August. During the last five months of the year, however, the total number of accidents for each month was much greater than for the corresponding month of 1915. This loss outweighed the gain for the seven earlier months, so that the total for 1916 is about one-half of one per cent. higher than 1915. The totals are 22,540 for the year 1915 and 22,638 for the year 1916. For the period January to August, 1916, the total was 12,053 as compared with 13,070 for the same period of 1915, a gain of over 8 per cent.

### COMPARATIVE TABLE

Showing the number of highway accidents in which persons were killed or injured in New York City and in each Borough during each month of 1916 and 1915:

# ANNUAL REPORT OF THE

## Effect of Car Strike.

In the foregoing table each monthly total which exceeds the total for the corresponding months of 1915 is printed in bold face type. This shows clearly that the increases in accidents were not only in the strike months but also in the boroughs most directly affected by the strike—Manhattan and The Bronx. The first effect of the strike was an increase in the number of persons struck by automobiles. This was due to two causes: first, the large number of traffic officers and patrolmen withdrawn from the usual posts to guard transit lines; and second, the extemporized “jitney” service which tried to handle the transportation problem. At first there was a decrease in the number of persons struck by street cars and in the number of falls from street cars, due to the fact that fewer cars were running. Collisions in which street cars were involved began to increase at once. The following table shows the record on these classes of accident.

## HIGHWAY ACCIDENTS IN MANHATTAN IN WHICH STREET CARS WERE INVOLVED, EXCLUDING ALL CASES IN WHICH NO ONE WAS INJURED.

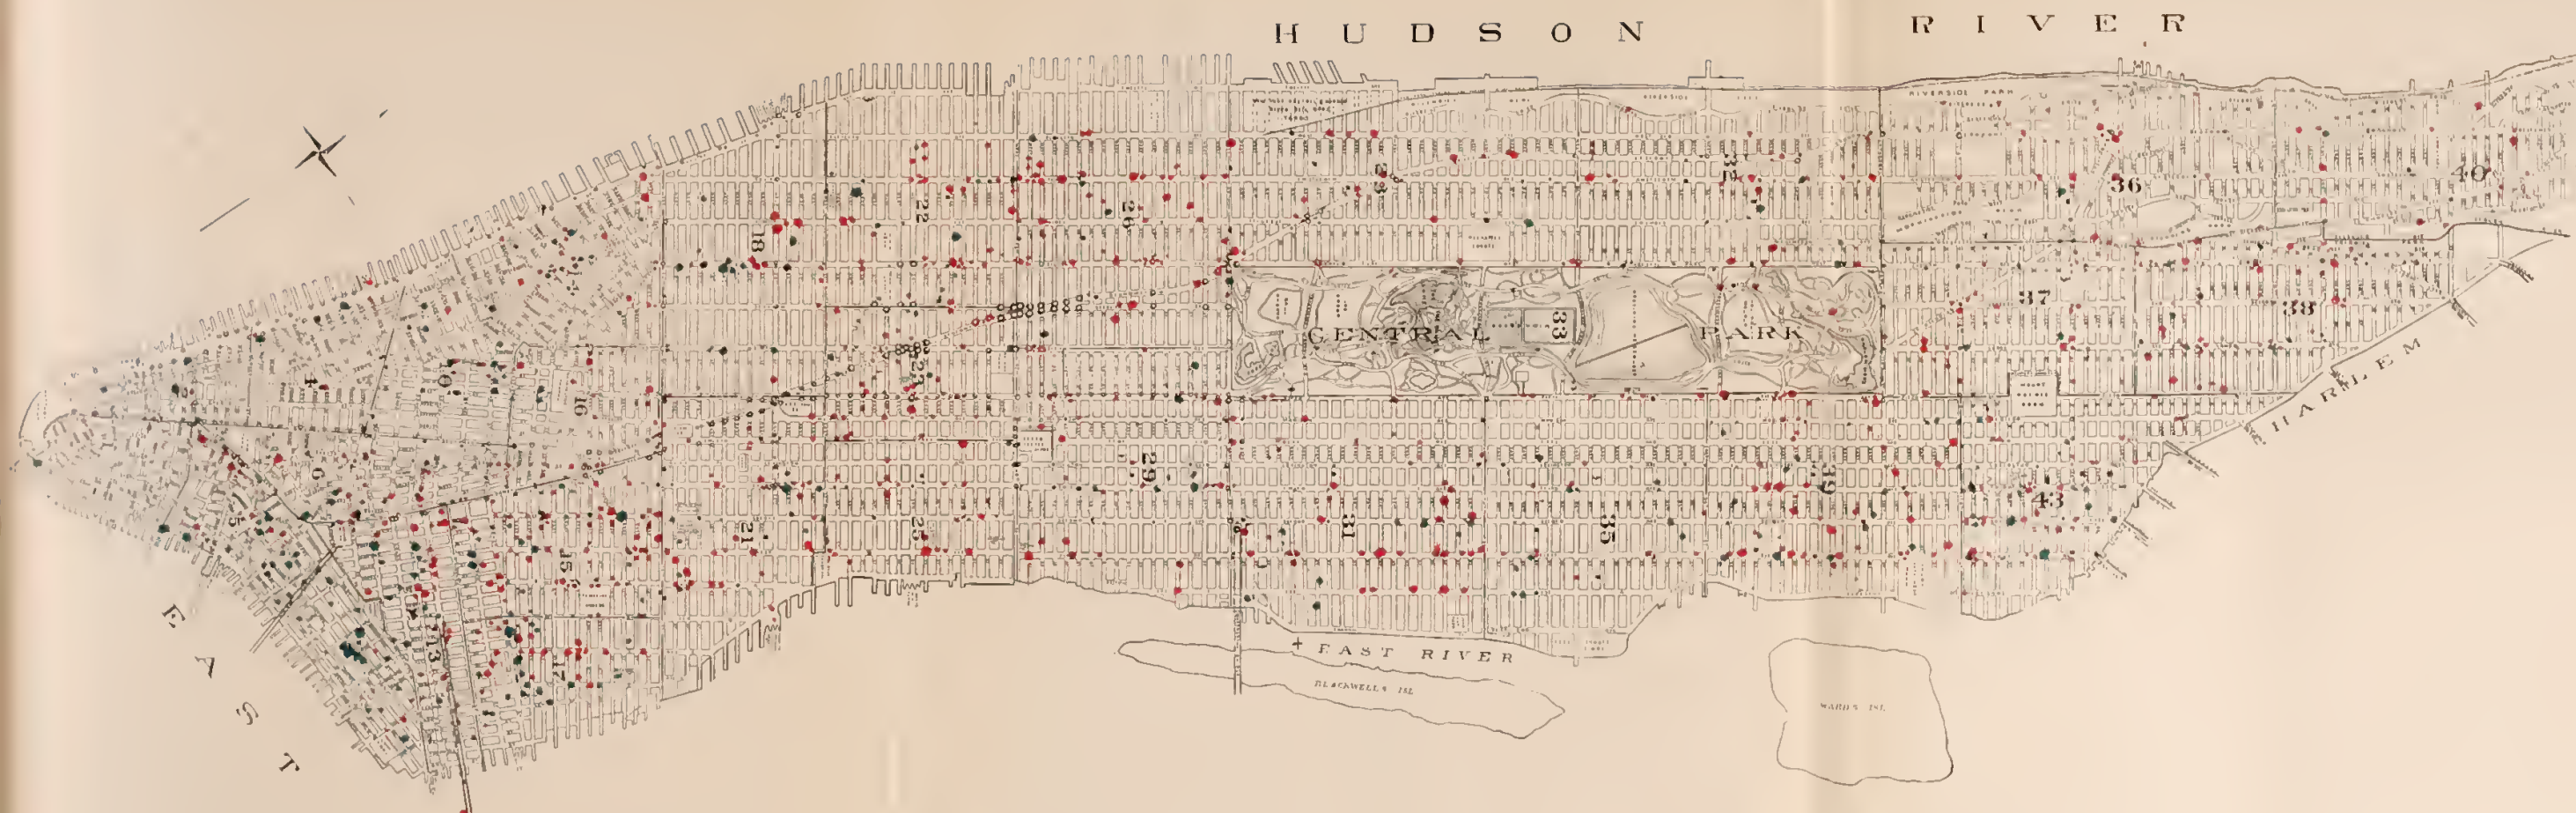

MONTH	STREET CARS STRUCK PERSONS		FALLS, ETC. FROM STREET CARS		COLLISIONS INVOLVING STREET CARS	
	1916	1915	1916	1915	1916	1915
January - - - -	82	77	58	*	45	*
February - - - -	76	88	43	*	37	*
March - - - -	86	42	59	*	48	*
April - - - -	104	119	60	*	33	*
May - - - -	108	95	128	*	42	*
June - - - -	88	93	108	*	41	*
July - - - -	64	87	118	120	47	30
August - - - -	67	97	141	137	56	41
September - - - -	59	80	71	116	77	38

November - - - -	140	90	77	64	162	55
December - - - -	134	85	70	50	107	46

\* In the compilations for these months street cars were not distinguished from other vehicles.

## Trend of Changes.

The aggregate number of accidents in the city as a whole for 1917 differs but slightly from the corresponding aggregate for 1916; but the sub-totals for the different kinds of accidents show striking changes from the corresponding

LARGE CIRCLES indicate traffic posts, day and night.  
 SMALL CIRCLES indicate traffic posts, day.  
 RED DOTS indicate persons struck by motor vehicles.  
 BLUE DOTS indicate persons struck by horse drawn vehicles.  
 BLACK DOTS indicate all other vehicular accidents.  
 LARGE DOTS indicate persons fatally injured.  
 SMALL DOTS indicate persons seriously injured.

## POLICE DEPARTMENT

sub-totals of 1916. Accidents due to Motor Vehicles increased while all other classes of accident, except collisions, decreased. The exception is significant, since over one-half of the collisions (1,591) in 1916 involved motor vehicles. The increase in cases of automobiles or motor trucks striking pedestrians is 1,414 or 23 per cent.; the increase in collisions is 452 or 18 per cent.; the sum of all the decreases is 1,768 or 12 per cent.

NATURE OF ACCIDENTS	NUMBER OF ACCIDENTS	
	1916	1915

### Fatalities.

Every accident carries the potentiality of serious injury or death. Whether the worst possible result follows or not is largely a matter of chance. For this reason, in compiling tables for administrative purposes, this department takes as the statistical unit the "accident" rather than the "death." A further reason for this practice lies in the fact that many deaths occur several days, weeks, or even months after the accidents which are primarily accountable for them. The precinct commanders try to "follow up" all hospital cases, and are fairly successful, but the Department has no direct source of information concerning deaths which occur at the homes of the victims. Through the courtesy of the Health Department, this department checks up death certificates in which "highway accident" is given as cause of death. The articulation of these certificates with the records of the Police Department is a difficult

## ANNUAL REPORT OF THE

---

matter. For example—the place of the accident is ordinarily of slight importance to the Health Department, but unless it is reported the case is difficult to trace. There must be many cases of non-residents injured on the streets of this city who later die outside the city limits and whose deaths are unknown to either department.

The total number of persons injured or killed during the year is 24,464, of whom 644 are known to have died. The corresponding figures for last year are 23,980 and 659 respectively.

Over half (335) of the deaths were caused by automobiles and motor trucks striking pedestrians. Thirty other deaths resulted from collisions in which motor vehicles were involved.

### **Age of Victims.**

The age distribution of the persons killed or injured shows clearly that the streets are not safe places for children and old persons. Of the 644 deaths known to the police, 267 were of children under sixteen and 139 were of adults of fifty or over.

Of the 496 deaths due to a vehicle striking pedestrian, 362 were children or old people, as limited above.

Part 1 of the Highway Accident tables shows the number of persons killed or injured and the number of known deaths in each of three significant age groups for each class of accident.

### **Place of Accident.**

Over one-half of the accidents occur on the streets at places other than the authorized crosswalks, safety zones, etc. On the other hand, vehicles invade the places reserved for pedestrians. There were fifty-five cases of accidents within safety zones and isles of safety; of these only four were non-vehicular accidents. There were 179 cases of vehicular accidents upon sidewalks.

The spot map of Manhattan, shown on another page, shows the location of each vehicular accident in which a person was seriously or fatally injured.

### **Time of Accident.**

Part IV of the Highway Accident tables distributes each class of accident according to the hours of the day in which instances occur. Over half of the accidents fall between 2 P. M. and 9 P. M. The forenoon is comparatively quiet; less than one-quarter of all the accidents happened between 4 A. M. and noon. About one-twelfth of all accidents fall between 11 P. M. and 7 the

POLICE SAFETY BOOTH USED AT MOTOR VEHICLE SHOWS IN THE CAMPAIGN AGAINST STREET ACCIDENTS

## POLICE DEPARTMENT

---

next morning. This distribution of accidents indicates fairly the lack of forethought in using the highways. In the forenoon, especially the early morning, the streets are unused; in the afternoon they are congested.

### Annual Accident Cycle.

Part V of the Highway Accident tables shows each class of accident distributed according to the month in which the instances occurred. The seasonal character of most classes of accidents is marked. The chart of page 67, visualizes the waves of the four principal groups of accidents.

### ADVERTISING CAMPAIGN AGAINST STREET ACCIDENTS.

In searching for additional means to keep down the number of street accidents, the department early in the year decided upon an advertising campaign. Mr. Henry Jay Case, Secretary to the Commissioner, was in charge of this, with the cordial and invaluable co-operation of the New York General Committee of the Advertising Club of New York, who gave their time freely and generously.

Previous to this arrangement, members of the force had, upon the invitation of the Commissioner, submitted suggestions on ways to educate the public against the menace of street dangers. Many of these were excellent, and much of the material submitted was used in the campaign.

Using as a text the picture of a policeman bearing an injured child in his arms, over a caption appealing to "You Who Drive," facts, figures and headlines telling the tale of the killed and maimed in the streets of the city were systematically published in newspapers, surface cars, elevated and subway trains, moving picture houses, store windows, bill boards, display signs, advertising columns, schools, theatres and about every public place imaginable. Merchants, banks, storage warehouses, corporations, department stores and other large advertisers gladly included warnings against street accidents in their regular newspaper advertisements. Life insurance companies used them in circulars. The advertisements advised the public to ask a policeman for the Police Safety Booklet, and policemen on post carried carefully prepared advice and warnings in the form of small green pamphlets, which they handed to every citizen who asked for a copy.

Fifty thousand window cards, 300,000 safety folders and 1,000 stereopticon slides were printed and distributed by the department alone. One of the most effective means of securing co-operation between drivers and pedestrians was a motion picture film of the campaign itself which the film producers and house managers took up and energetically pushed over every cinema circuit, not only in New York City but the whole United States and Canada.

### HELP PROTECT YOURSELF

Here are some specific rules to help you save your life and property.

#### You Who Walk

1. Don't run across streets through heavy traffic. The busiest man I know wastes at least 30 minutes a day; why risk your life to save 5 seconds crossing the street.
2. Over 22,000 persons were injured last year and 650 killed by street accidents. That means one person killed every 14 hours and one injured every 23 minutes.
3. Cross streets at crossings only. Watch for the policeman's signals. He is always willing to help you.
4. Never attempt to cross a street with a bundle or umbrella over your head or reading a newspaper. Either hides oncoming vehicles from your view.
5. Never jump off a moving car. Wait for it to stop and then look out for traffic.
6. Stand still if you get caught in a traffic jam. It may save your life.
7. Children suffer the heaviest toll of deaths because they are the most reckless.

Here are some of the ways in which children, the heaviest sufferers, are killed or hurt:

Hitching on backs of wagons or street cars, roller skating in the roadway, sliding on pushmobiles in the roadway, daring each other to run across the street in front of approaching vehicles, engaging in street fights, building bonfires, playing on fire-escapes and unprotected roofs, riding bicycles in heavy traffic streets.

Advise your children not to do these things.

#### You Who Drive

1. Help people to help themselves.
2. Don't imagine you are within your rights if you go at the maximum speed allowed by Law. You must not endanger the safety of others.
3. Your responsibility does not end with the honking of the horn when others are in your path.

## Do you know?

### I. That by Street Accidents in New York City

One person is killed every 14 hours and

One person is injured every 23 minutes

And

### II. That You May be the Next Person Killed or Injured, Unless You Obey these Rules

1. Never cross the streets except at crossings.
2. Never hitch behind wagons or automobiles.
3. Do not play games in the middle of the street.
4. Never chase your ball before first seeing that no wagons or automobiles are coming **up or down**.  
It is better to save your life than your ball.
5. Always keep your eyes open and your wits about you.
6. Be careful, and make your friends be careful too.  
Save their lives as well as your own.
7. Ask your policeman for "Safety Booklet."

LEAFLET USED IN THEATRE PROGRAMMES

### THE MENACE OF HABIT-FORMING DRUGS.

Breaking up illicit traffic between outlaw distributors in this city, and agents in different parts of the United States, Canada and Mexico, formed a good part of the work of the Department last year in its campaign against the peddlers and users of habit-forming drugs. No sooner had one line of communication been suppressed than the existence of another was discovered. This situation, we believe, will continue indefinitely, unless drastic Federal laws are passed absolutely controlling, by means of licensing, registration and inspection, the manufacture and distribution, of these drugs. With the exception of a few

## ANNUAL REPORT OF THE

---

unscrupulous manufacturers, the wholesalers, doctors, dentists and druggists in the city are doing everything possible to comply with the provisions of the present law. The principal source of the mischief last year was found to be the ease with which these drugs could be handled through interstate shipments, and then reshipped back to this city through illicit channels; here, adulterated; prepared in small, individual packages and resold at exorbitant prices by street peddlers.

The methods used in carrying on this trade have been found to be most ingenious. Secret signal codes and hidden places of delivery are used continually, and it has required the shrewdest and most active detective work to hold traffic within any limits at all.

During the year, 2,532 arrests were made for selling, possessing or using habit forming drugs. This compares with totals of 1,978 and 1,950 for the years 1915 and 1914. Convictions were obtained in 1,985 cases. On these convictions, 1,609 persons were sent to prisons or institutions, 78 were fined, 51 were paroled and 247 received suspended sentence.

### JUVENILE DELINQUENCY.

Arrests for Juvenile Delinquency have been falling off for several years now, an especially marked decrease being reported for 1916 as against the previous year. We believe that one reason for this is the growing practice of policemen in trying to correct youthful errors by admonition and warning, instead of making indiscriminate arrests.

Appended are several different tables showing the results of our statistical study of these offenses. It must be kept in mind that the figures upon which we base these tables are taken from police and court reports, and that usually the word of the young person examined or some member of his family has to be taken as final, because we haven't time nor the means to verify all the answers.

#### ARRESTS FOR JUVENILE DELINQUENCY.

1910	-	-	-	-	-	-	10,914
1911	-	-	-	-	-	-	10,293
1912	-	-	-	-	-	-	10,838
1913	-	-	-	-	-	-	9,553
1914	-	-	-	-	-	-	8,698
1915	-	-	-	-	-	-	9,818
1916	-	-	-	-	-	-	8,009

Prior to 1916 there was no analysis of the juvenile arrest totals, but for this year there has been prepared an analysis by nature of offense, age, sex, nativity, nativity of parents, occupation and employment, with several cross-classifications

POLICEMEN WARNING SCHOOL BOYS AGAINST THE DANGER OF STREET ACCIDENTS

## POLICE DEPARTMENT

of these elements. The study has been based upon convictions rather than arrests, in order that there may be no question of delinquency, and the offenses have been grouped to correspond with the offenses committed by adults. Offenses which would not have been crimes if committed by adults have been segregated and subdivided into significant classes; lastly destitute children, not guilty of any offense, but who have had to be technically arrested, have been shown as a distinct class.

### CONVICTIONS FOR JUVENILE DELINQUENCY DURING THE YEAR 1916.

GENERAL NATURE OF OFFENSE	Total	Boys	Girls
Miscellaneous Offenses - - - -	14	13	1
Offenses Against the Person - - - -	247	242	5
Offenses Against Chastity - - - -	58	40	18
Offenses Called Juvenile Delinquency by Statute -	17	17	—
Offenses Against Public Regulation - - - -	11	9	2
Offenses Against Administration of Government -	6	5	1
Offenses Against Property, Destruction - -	249	248	1
Offenses Against Property, Theft Other than Burglary	1,200	1,149	51
Offenses Against Property, Burglary - - - -	1,045	1,038	7
General Criminality - - - - -	1,500	1,408	92
Prohibited Acts - - - - -	8	8	—
Attending Resorts Prohibited by Law - -	22	16	6
Prohibited Employments - - - - -	47	45	2
Incorrigibility - - - - -	502	351	151
Educational Violations - - - - -	27	19	8
Vagrancy - - - - -	25	21	4
Destitute Children - - - - -	526	312	214
	5,504	4,941	563

The astonishing fact in this table is the large number of boys convicted of burglary, and the number of sneak thieves on the way to become burglars.

#### Age of Delinquents.

The age 16, taken as the dividing line between juveniles and adults, is an arbitrary line, especially for girls, as the following table shows. There is a sharp increase in the amount of delinquency among girls at age 15.

# ANNUAL REPORT OF THE

Age of Delinquent	Number Convicted	
	Boys	Girls
Age not given - - - -	69	13
Under 1 year - - - -	3	5
1 year and over up to 2 years - -	-	8

12 years and over up to 13 years - -	664	36
13 years and over up to 14 years - -	765	54
14 years and over up to 15 years - -	926	90
15 years and over up to 16 years - -	1,253	190
	4,941	563

## Nativity, and Nativity of Parents.

This community has been characterized as a "melting pot" for the world, and as such the melting process has grave possibilities for the children. They may become dissatisfied with the manner and ethics of the old country before they have fully acquired those of the new country. Again, the half-Americanized child has many spiritual conflicts, and many not so spiritual with his foreign-minded parents. The weakening of his respect for his parents and their rules of conduct often leads to a disrespect for all authority whatsoever. In this way many a law-abiding parent has been shamed by the waywardness of his children here.

(The nationality or race indicated by the figures is that given by the child in answers to questions.)

	Boys	Girls
Foreign born of foreign parents -	909	78
Native born of foreign parents -	2,474	246
Native born, one parent foreign -	121	22
Native born, native parents - -	1,437	217

Over fifty different occupations were represented, but half of the boys claimed to be messengers or office boys, while half of the girls claimed to be servants.

## CRIME PREVENTION

During the past year the Force has made progress in using new methods of preventing crime—trying to prevent people from becoming criminals. This work includes keeping boys and girls away from the influence of bad gangs ;

INTERIOR COURT PLAYGROUNDS ADVOCATED BY THE POLICE TO HELP KEEP CHILDREN OFF THE STREETS

## POLICE DEPARTMENT

---

studying persons arrested to discover mental deficiency ; extending aid to men released from prisons to help them to become self-supporting, law-abiding citizens, relieving distress and destitution in those classes who have been hereditary enemies of the police and making friends with them. Also by talks and lectures to illustrate to householders, shopkeepers and merchants effective ways to protect their property against thieves and to correct themselves of careless household habits which encourage thieves to prey upon them.

One of the most encouraging results has been obtained from the assignment of young policemen to work in districts throughout the city, reporting direct to the Commissioner on local conditions which tend to increase crime. By means of these young policemen and their intimate knowledge of local conditions, Headquarters has secured most useful information on which constructive police action has been taken to eliminate many evils. In addition to their other work these young officers have been able to do a great deal of good as Big Brothers to the boys and girls whom they meet.

### Aid to Men Released from Prisons.

In accordance with the laws of 1915 creating the Parole Commission, police sergeants, assigned about the middle of the summer of 1916 as parole officers in their respective precincts, have helped 612 men. In this time 30 subjects have been arrested during the parole period, and 50 have disappeared.

This work is in addition to the sergeants' regular duty, and for the most part they have entered into it with enthusiasm and increased interest. The aim and object is to impress upon the prisoner from the first that he is going to be treated as a friend, and that the Department stands ready at all times to help keep him out of penal institutions, and to make him into a useful member of society. A paroled prisoner is naturally suspicious of the motive of the sergeant, and to overcome this suspicion is the greatest task of the policeman.

Police sergeants have been particularly cautioned against revealing to the general public in any way that their charges are prisoners on parole. Common sense has to rule the handling of each case, as hard and fast rules cannot be laid down. Much must be left to the intelligence and judgment of the officers.

For years past men out of prison have claimed that the police "hounded" them and that they were never given a real chance to make good. To correct this impression, police sergeants have been talking in institutions offering any man or boy a helping hand if he would go to a police officer or to a precinct station and ask for assistance. These officers have told their hearers that all those wanting such help would not only be given assistance, but would be helped towards getting positions where they could support themselves and enjoy the real liberty that comes from an honest, self-supporting life.

Out of the 115 men who came to the policemen in 1916 for assistance in obtaining positions or some other help, 162 jobs were obtained. These include only those jobs where the men have worked for more than a week. These 115

men, the report shows, have been in prison 267 times or an average of twice to a man, and the crimes for which they were sentenced to prison include everything from burglaries to homicides. Out of the 115, eight have been re-sentenced, 79 are now working, 15 were lost track of, and in 13 cases it is still a question as to whether they will continue to go straight or fall into their old habits again.

When a person applies for help such as this, he either comes himself or writes a letter to the Commissioner, or is sent in by some organization. Investigation of his case is first made, and if he is found to be telling the truth and demonstrates his sincerity in trying to go straight, a job is found for him, and food, and sometimes clothing, are provided until he can establish himself. Once employment is found, he is required to report at least once a week until the officer is satisfied that he is getting along satisfactorily, and in finding such places, employers are told plain facts. There is no attempt on the part of the police to disguise the truth.

### The Unemployable.

A census taken of lodging houses, missions, shelters, bread lines, parks, docks and under the bridges on January 20, 1915 totaled 23,241, of which 22,446 were males and 795 females. On the night of January 22, 1916, a similar census was taken and showed a total of 21,200, of which 20,395 were males and 805 females. These totals include all classes from those who make the lodging houses their permanent homes, to the vagrant who eats in the bread line and sleeps in the park. Sixty-four per cent. of the 1916 count were found to be natives of New York City, or had been in New York City for the last two years, and thirty-six per cent. had lived in New York City less than two years. These figures are substantiated by the records of the Municipal Lodging House, the Bowery Mission, and other similar institutions. New York City, therefore, apparently, produces the greater portion of this shiftless, unemployed vagrant population.

During the time the bread lines were being visited, it is estimated that 3,000 men were offered jobs and out of this number less than fifty made any effort to avail themselves of the opportunity offered by the Police.

In 1916 the total arrests for vagrancy were 2,024, or less than half the number of the previous year, which ran to 4,602, the reduction being primarily due to the working of the new Parole Law recently enacted. Previous to 1916 such vagrants were arrested, committed to the Workhouse for sentences ranging from ten days to six months, depending upon the previous convictions. At the expiration of their sentence they returned to the city and continued begging, being again arrested and committed. This old "in and out" system often continued for some years, some men having as many as sixteen convictions.

To-day under the new Parole Act, vagrants are paroled only after the Parole Board has become convinced that the prisoner is able and competent to provide for himself and has a position in view. But many such persons are unemploy-

POLICEMEN GUARDING CHILDREN ON PUBLIC SKATING PONDS

## POLICE DEPARTMENT

---

able. Among them are found ordinary tramps, criminals, defectives, most of whom are totally unable to provide for themselves.

The real solution of the problem seems to be the complete removal of these persons from the city streets to an Industrial Farm Colony. Three years ago the State of New York appropriated \$100,000 and created an Industrial Farm Colony Commission for the establishment of just such a colony. \$60,000 was spent for a site at Beekman, Dutchess County, but no further action was taken towards the establishment of the colony; and the remaining \$40,000 reverted back the State Treasury. There is now an accumulation of vagrants in our city institutions, sentenced for indeterminate periods under the new Parole Law. Wide facilities for their care are urgently needed and an Industrial Farm Colony is the obvious solution.

### SEEKING OUT DEFECTIVES.

Through funds subscribed by friends of the Department, we were able in November, 1916, to resume the experiment with the Psychopathic Laboratory, started early in the preceding year, but abandoned for lack of money. The work has been continued in charge of a committee composed of Dr. Menas S. Gregory, Director, Psychopathic Ward, Bellevue Hospital; Dr. Thomas H. Salmon, Chairman, National Committee on Mental Hygiene; and Dr. George H. Kirby, Director of Clinical Psychiatry at the Manhattan State Hospital, Ward's Island.

On account of the little time remaining for work in 1916, no figures are available for comment, but for examination in the Laboratory, prisoners have been selected each morning from the "line-up," and also from the preceding night's arrests in the various Precinct houses. A complete history of the prisoner's life has been obtained from him, and this supplemented by information obtained by the social worker who interviewed members of the prisoner's family. These facts, together with the report of the psychological findings, form the basis for conclusions regarding the prisoner's mental condition.

Other cases examined in the Laboratory have been those of persons who voluntarily come to Police Headquarters or Precinct Station Houses and who appear to need examination as to their mental condition. A number of these persons have been found insane and sent to the Psychopathic Ward, Bellevue, for observation.

As soon as a definite conclusion is reached as to the particular form of abnormality of any of these persons they have been taken to court with a letter from the Commissioner, forwarding a recommendation of the doctor's that the prisoner be confined in an institution for treatment or for permanent care, rather than be put on trial. This procedure, the authorities believe, is far more economical and humane than to try to secure a conviction and send the prisoner to a

## ANNUAL REPORT OF THE

---

penal institution where their mental condition is only made worse; where they may be started on their way through the old in and out system of hopeless punishment, and through this become a menace to society by reason of their irresponsible mental condition.

### CHRISTMAS IN THE STATION HOUSES.

Christmas, 1916, was celebrated in fifty-odd Precinct Station Houses with Christmas trees, Yule-tide decorations, presents for children, songs, dances, stereopticon slides, moving pictures and talks by the Captains. Over 40,000 children throughout the Greater City, and members of their families, who otherwise would not have been able to get nearer to a real Christmas celebration than the outside of a store window, were reached by the police in this manner, and fifty-odd thousand dollars contributed by residents of the Precincts were spent in making these Christmas trees a success. We tried, in this way, to bring about a better understanding between children, fathers and mothers, and the police of the city, and to create a spirit of better co-operation between the public and the police.

In response to the appeal for funds, citizens came forward generously and their offerings, given in real spirit of Christmas, were as much as anything else the feature of this holiday event.

The subscriptions ranged from 5 cents to \$25, and in only a few cases were checks of over one hundred dollars received. One check for \$500 came in, but most of the money was given by policemen themselves, clerks, factory employes, salesmen and saleswomen in the big stores, business men, doctors and lawyers, housewives and school children.

In many cases the people of the Precinct helped the policemen to decorate the station houses, and a great many neighborhood residents offered their services in helping to entertain the children with songs, music and reading. In some Precincts upwards of 2,500 and 3,000 children were entertained on this day. Each child received a Christmas package containing candy, an orange, a toy and either a pair of woolen mittens or stockings, and where a family was found to be in actual distress or destitution, orders on grocery stores, butcher shops and fuel dealers for supplies were given the father or mother.

As a result of this celebration there is to-day less reluctance on the part of these particular children and their parents to come to the policeman when in trouble and a more cordial relation between the policeman on his beat and the families who are placed in his care. Boys and girls who heretofore have instinctively regarded the policeman as their hereditary enemy, to-day greet him as a friend and take his advice and warning as coming from a friend when the policeman calls at their home for that purpose, or seeks them out to carry useful information to them.

ONE OF THE FIFTY ODD CHRISTMAS TREE CELEBRATIONS GIVEN BY THE POLICE IN PRECINCT STATION HOUSES

## POLICE DEPARTMENT

### THE JUNIOR POLICE.

During the past year there has been a marked increase in the membership of the Junior Police, which, at the end of December, had been established in twenty-two precincts, and showed a strength of approximately 4,000. This juvenile corps, organized in the fall of 1914, offers instruction in military and athletic drills, civil government and good conduct to all boys of the neighborhood. Its purpose is to supply boys of the city with entertainment and recreation, develop in them a feeling of civic responsibility, establish a more cordial relation with the police, and help lay the foundation of good American citizenship.

The members do no regular police work, but are expected to aid policemen by complying with certain duties which are as follows:

1. Use clean and decent language at home, in the school, and in all public places.
2. Never "hitch" on wagons and street cars.
3. Always cross the street at the corners, and never in the middle of the block.
4. Do not build bonfires in the street.
5. Do not break windows or street lamps, nor deface buildings and sidewalks with chalk.
6. Do not smoke cigarettes nor play crap.
7. See that persons do not place encumbrances or obstructions on fire-escapes.
8. See that ashes, garbage and paper are not mixed.
9. See that the garbage cans are kept covered, and that ash and garbage cans are promptly removed from the sidewalk when emptied.
10. Request persons to keep the sidewalk and areaway in front of their building clean and not throw refuse in the street.
11. Make especial effort to perform duties 7, 8, 9 and 10 at your own homes. See that your parents and relatives do not violate the laws and ordinances.
12. For the above purpose do not enter any building under any condition.

Each boy, when he joins, is given a pledge card by the Commanding Officer or some other member of the uniformed Force designated by him. After the boy commits to memory the contents of the pledge card, he is sworn in as a regularly appointed Junior Policeman, after which a membership card is filled out for that boy and placed on file in the office of the Precinct Commander. The boy is then directed to attend two drills and two meetings, covering a period of two weeks. If his attendance and conduct is perfect he is then given a shield for which he deposits fifteen cents, and for which he is held responsible. The boys are at all times required to be orderly and respectful in their deportment, obedient to their parents, and to promptly obey the commands of their superior officer while attending drills and meetings.

# ANNUAL REPORT OF THE

---

## THE ANNUAL GAMES.

The fact that over 75,000 persons attended the Third Annual Field Days on June 24 and July 1, gives some idea of the increasing interest of the public in this splendid entertainment given by the Force.

The gross receipts of the 1916 games amounted to \$88,888.80, which went to police benefit funds—\$20,000 for aiding widows and orphans of policemen who have been in service less than ten years; \$10,000 for sick and injured policemen, and \$51,000 to the Honor Roll Relief Fund. Such good-sized contributions for these worthy bodies was largely helped by the donation of the use of the Sheepshead Bay Speedway ground by its owners, and by the management of the games which kept the total expenses down to less than 8 per cent. of the total gross receipts.

The games themselves were more extensive than on the two previous years, including foot races, horse races, motorcycle and bicycle races, trick and Cossack riding, calisthenic drills, battle exercises, parades and field events. Keen, healthy rivalry and competition was manifest amongst the individual contestants and between precinct and district teams, and the strength and skill exhibited by the competitors was received with roars of applause from the thousands of spectators packed in the big stand.

## THE POLICE CHORUS.

Under the guidance of a trained musical director, one hundred members of the Force have been singing together now for a little over a year. This chorus made its first public appearance in the spring of 1916, at the Departmental Service in honor of those who had died during the past year, and won favorable comment from both the public and from musical critics.

The idea of effecting the organization was suggested by the singing of a quartette of uniformed policemen at the funeral of the late Father Sullivan, a police chaplain, who devoted a great part of his life to the good of the Force. Subsequently, volunteers were called for, and in November, 1915, the testing of voices was begun by Mr. Charles L. Safford, an organist of unusual experience in chorus singing, who volunteered his services for this task. By the beginning of 1916 rehearsals with music of a general character were under way, and in February preparations started for the special program of song for the memorial service in Metropolitan Opera House, which had been donated to the department by the managing directors for one afternoon.

The musical numbers rendered on this occasion were simple and impressive, and made all the more so by the co-operation of the Police Band. Following this program, rehearsals by the chorus were continued up to summer, and then temporarily suspended, owing to the vacation periods. On ac-

CAPTAIN SWENEY AND SOME OF THE INSPECTORS AND CAPTAINS OF THE JUNIOR POLICE

## POLICE DEPARTMENT

---

count of the traction strike and the extra demands made upon the Force, rehearsals were not resumed until the beginning of winter, when a permanent organization was effected through which the affairs of the chorus could be administered in a business-like manner, one of the chief things attempted being the start of a library.

Such musical work as this chorus is doing, is, I believe, one of the best forms of community singing, and the beneficial effect of community singing is recognized the world over. It is not only a healthy form of recreation, but affords the best kind of social enjoyment and the interchange of ideas and opinions under the lifting influence of good music.

### COST OF POLICE SERVICE.

Since the formation of the Greater City, the cost of conducting the Department, exclusive of pensions, has risen from \$10,305,340.43 in 1898 to \$15,803,940.40 in 1916. The uniformed force during that period has grown from 7,457 to 10,700; the population of the City from 3,272,418 to 5,603,841. The per capita cost of police service therefore has been decreasing. During 1916 it was \$2.82 per capita as compared with an average of over \$3.00 during the period from 1898 to 1911, and approximately \$2.90 during the period 1911 to 1915. The average annual increase in expenditures during the period 1898 to 1914 was \$347,512.06, and for the three years 1911 to 1914 \$411,232.98, as compared with an average annual increase of approximately \$142,959.55 during the past two years.

Salary increases have been granted to different ranks of the uniformed force on three occasions. In 1909, the salaries of Lieutenants and First Grade Detectives were increased from \$2,000 to \$2,250 per annum. In 1910, the salary of Sergeants was increased from \$1,500 to \$1,750, and in 1913 the salaries of Patrolmen receiving \$800 and \$900 per year were increased to \$1,000.

The civilian clerical force has been more than doubled in the period from 1898 to 1916. There were 157 civilian employes in the Department in 1898, and 319 in 1916. The civilians have taken the places of and are doing the work formerly done by employes of the uniformed force detailed to special duty, so that their employment has in effect resulted in an increase of the available police force.

Increase in the numbers of the uniformed force increases the budget not only at the time the additional force is added, but for a period of five years thereafter, because of the mandatory salary increases; for example, the 454 additional policemen who were employed in 1913 received \$1,000 each for the first three years, \$1,150 for the fourth year, \$1,250 for the first half of the fifth year, \$1,350 for the second half of the fifth, and \$1,450 at the beginning of the sixth year.

## ANNUAL REPORT OF THE

The figures of total and per capita cost, etc., given in the foregoing paragraphs are summarized in the following table :

COMPARATIVE STATEMENT OF EXPENDITURES, ETC.

YEAR	EXPENDITURES	PER CAPITA	AVERAGE ANNUAL INCREASE
1898	\$10,305,340.43	3.15	
1910	14,179,231.57	2.96	
1911	14,384,322.35	2.92	
1913	14,997,811.07	2.89	
1914	15,518,021.29	2.91	{ 1898-1914, - \$347,512.06
1915	15,622,379.81	2.86	{ 1911-1914, - 411,232.98
1916	15,803,940.40	2.82	1914-1916, - 142,959.55

Respectfully yours,

ARTHUR WOODS,  
*Police Commissioner.*

## TELEPHONE SERVICE

There was an increase of 230,027 in recorded messages, and 1,019,540 in telephone connections during the year.

## BOILER SQUAD

The Boiler Squad is empowered by law to inspect and subject all steam boilers carrying over ten pounds of steam to the square inch to a hydrostatic test once a year, and to examine and qualify engineers and firemen to operate them.

The force of the Boiler Squad consists of one (1) Acting Sergeant, twelve (12) Patrolmen, two (2) civilian Boiler Inspectors, two (2) Deputy Clerks, one (1) Stenographer, nine (9) horse drawn vehicles, with nine (9) civilian drivers, under open contract with the Police Department, under command of a Lieutenant.

Two members of the uniformed force, who are practical engineers, are assigned to examine applicants for engineers' and firemen's certificates, and to hear and determine charges preferred against engineers and firemen for neglect of duty. There are nine (9) Boiler Inspectors, who are members of the uniformed force.
